

## **Journal Club (Wednesday 3 pm in South Building #321)**

Presentations (2-3 people, 5-15 minutes)

1. You do not have to understand everything in the paper! Just do the best you can—your classmates likely have many of the same questions!
2. In your presentation, please mention:
  - a. Question(s) asked and main conclusion
  - b. What did you find interesting?
  - c. What did you find confusing? (Are there any terminology you'd like to ask about?)
  - d. What are general questions you have (on background, on implications of their conclusions, etc)?
  - e. **Include powerpoint slides to go with your presentation.**
3. We encourage the presenters to meet and discuss the paper and make a single presentation, where all of you will speak for at least part of the time.

### **Wednesday July 26 – Albert Ko**

“Maternal ancestry and population history from whole mitochondrial genomes”

Toomas Kivisild, 2015

<https://investigativegenetics.biomedcentral.com/articles/10.1186/s13323-015-0022-2>

- WangHengzhi
- Jacob Gardner

### **Wednesday August 4 – WangHongru**

“An Ancient Human Genome Sequence of an Extinct Palaeo-Eskimo”

Rasmussen et al. 2010

<http://www.nature.com/nature/journal/v463/n7282/full/nature08835.html?foxtrotcallback=true>

- ZhangMing
- CuiMengjie
- LiJingbo

### **Wednesday August 9 – Melinda Yang**

“Altitude Adaptation in Tibetans Caused by Introgression of Denisovan-like DNA”

Huerta-Sanchez et al. 2014

<http://www.nature.com/nature/journal/v512/n7513/abs/nature13408.html>

- ZhengZequan
- DingManyu
- LiuJunCen

### **Wednesday August 16 – TBA – Something related to early modern humans**

TBA

- GuoKangning
- SunGangyu
